Detritus

Detritus is defined as any matter produced by erosion, such as gravel, sand, silt, or rock. it also refers to debris or waste of any kind; rubbish, litter, scrap, flotsam and jetsam, rubble; remains, fragments, scraps, leavings, sweepings, scum, trash and garbabe; plus organic matter produced by the decomposition of organisms.
Interpret the word *detritus*, and make photographs of detritus using design principles especially balance.

Use the space below to write about the Photo you plan to uploaded to Photoshop.com.

How does your photo make use of the Design Principles we've studied, in particular, Balance? Speak about what kind of balance you used.
