

ASSEMBLAGE: too much stuff

GRADING RUBRIC

Problem:

Using objects, materials and elements you find or acquire in some way, make a sculpture that is at least 3 feet x 2 feet x 2 feet. Consider not only the objects used but also the way the piece uses space.

This project goal is to:

1. Create sculpture using found objects.
2. Work in collaboration with others.
3. Alter or exploit the meaning of existing objects

For the most part these grades are about WORK. Did you do the work? How well did you do the work? Does it look like you did all the steps to bring you to a reasonable solution?

	0-3 points	3.1-4.4 points	4.5-5 points
Criteria	Student work does not meet Expectations— Little or no evidence of work or consideration of criteria.	Student Work Meets Expectations— work indicates commitment to solving the problem as assigned.	Student Work Exceeds Expectations— work indicates sincere commitment to solving and evolving the problem as assigned.
Evidence of Process-- brainstorming and research— artists, reading notes, ideation sketches. <u>Individual.</u>			
Complexity in construction. Does the piece have a variety of sculptural forms? Have you spent time on construction? Is it three-dimensional?			
Is there coherence to the forms used? Do they come together to create meaning?			
Does the piece look finished and professional or is it messy? Have you taken care with craft ?			
Have you used objects creatively ? Does your idea indicate development and revision?			
Self-evaluation – how does your piece solve the problem? See the criteria above for things to discuss. <u>Individual.</u>
