Self-evaluation Information

HomeworkAssignment: This assignment is the second conceptual work in Figure Drawing. It involves integrating more than one figure into a finished composition. You have many options for how the figures can integrate and including what kind of style, materials, size, etc. to use.

This is your first self-evaluation in Figure Drawing. The self-evaluation must accompany your drawing to receive full credit. It will be graded.

Use your drawing as evidence and write a paragraph or two that addresses these points:

Line use

Composition

Value development

Concept—**how** the drawing shows evidence of concept

Meaning—what meaning is created from the way the figures are arranged in the space?

Finish

In each case the operative word here is 'HOW.' Please note, I am not asking you to simply say if your drawing uses line or composition (of course it does), but how it uses these things.
